Subject: **Technical Comments on the Work Plan and Cost Estimates of Old Raleigh LF #4 Task Orders 687DP-1&2**

Dear Dan:

The work plan & cost looks good except the following places that need revised.

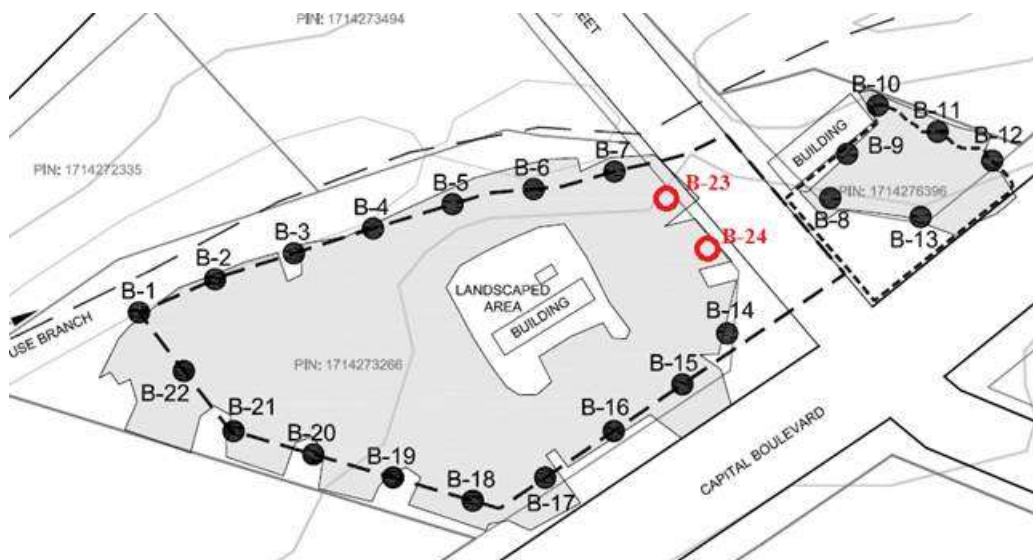

Once done, send me your Revision to me soon. Thanks.

Take care,

Chen

===== Technical Review Comments =====

1). Work Plan, Section 2, Sub-Section 2.1: Add two more soil bores (see the approximate locations B-23 and B-24 in map below). Reflect the additions in the final Work Plan & Cost Estimates accordingly.

2). Work Plan, Section 2, Sub-Section 2.3: Add 1,4 Dioxane analysis in the text despite included in Cost Estimate.

3). Work Plan, Section 2, Sub-Section 2.5: Change the title from "Survey" to "Utility Survey".

4). Work Plan, Section 3: Remove the word "**summary**" from all the phrases of "a draft summary report". We reserve the term of "Summary Report" for Remedial Investigation Summary Report in general.

5). Cost Estimate: Reflect the above changes, in the cost estimates accordingly.
